INCLUSIVE CLIMATE ENTREPRENEURSHIP PROJECT-SHINYANGA, TANZANIA

PRESENTER: ANNA JOEL
28 MAY 2026

ABOUT YAWE

A grassroots youth-led development organization working to empower women, youth, and children in Tanzania to lead independent, dignified lives and drive sustainable development in the communities.

OUR MISSION

To empower youth, women, and children with the skills, resources, and opportunities to actively drive sustainable and inclusive development in Tanzania.

INCLUSIVE CLIMATE ENTREPRENEURSHIP PROJECT

The project focused on strengthening climate resilience by enabling youth, women, and persons with disabilities (PWDs) entrepreneurs to actively participate in and lead inclusive beekeeping enterprises as sustainable green livelihood opportunities in rural areas of Shinyanga.

The project addressed social and economic exclusion, limited financial access, weak market connections, cultural barriers, inadequate entrepreneurship skills, as well as limited green job opportunities.

ENTREPRENEURS SUPPORTED

63

**total beneficiaries reached, forming 4
beekeeping groups supported**

64%

36%

24%

**of all beneficiaries reached were persons
with disabilities**

IMPACT HIGHLIGHTS

Generation of extra income

Whizabonzuki group produced 80 kg of honey → ~TZS 800,000/-
Equiv to euro 300

Improved adoption of modern smart-beekeeping practices

Baseline 26% → Edline 84% practice modern smart-beekeeping methods.

Improved governance and collaborations

Baseline 20% → 90% groups have been transformed into saving groups and formalized, and 50% of the groups are currently women-led.

Group members recognized as community role models.

Peer learning increased significantly, with community consultation rising from 18% at baseline to 64% at endline for skills and knowledge sharing

Improved access to climate-smart resources

Whizabonzuki Group received a TZS 5 million (approximately EUR 2,000) government soft loan for business expansion.

IMPACT STORY

Elice Elias, a project beneficiary and treasurer of the Kilimawe Beekeeping Group, shared how the program has helped strengthen local livelihoods through sustainable beekeeping activities.

Partnerships & Ecosystem

1. Tanzania Forest Services

Technical & conservation support

4. Government Authorities

Formalization of groups & long-term support with resources

3. ClimateKIC & Irish Aid

Funding and capacity development

2. Association of people Disabilities

Inclusion & Peer networks

Our Next Plan & Call to Action

- 1) Expand program support to reach 200 women and youth climate entrepreneurs in Shinyanga rural.
- 2) Scale up access to beekeeping equipment, including beehive distribution, and strengthen market linkages for climate-smart products.
- 3) Accelerate the adoption and replication of best practices and successful approaches identified during the past year

Our Call to Action

We are calling on partners and investors to join us in supporting 200 youth and women entrepreneurs in Shinyanga rural to adapt to the impacts of climate change through climate-smart beekeeping initiatives.
