OUR IMPACT ON NUTRITION

ABOUT US

Youth and Women Emancipation (Yawe) is a youth-led development organization working to improve the health and wellbeing of youth, children and women in Tanzania.

OUR VISION

A society where an empowered and responsible youth, children and women realize their potential and make an informed decisions about their health and lives .

OUR MISSION

To contribute toward sustainable and inclusive development in Tanzania through education, mentorship and innovative programs designed to improve the wellbeing of youth, children and women.

GUARANTEEING THE FUTURE PROJECT

From 1st September 2022 to 31st August 2023, Yawe partnered with the Doctors with Africa CUAMM to implement the “Guaranteeing the Future Project in Bariadi district,” **aiming at improving the nutritional status of children under 5 years in Bariadi council, covering 8 wards and 31 villages.**

EXPECTED PROJECT RESULTS

- Increased the capacity of target health facilities to offer quality and accessible nutritional services for children under-5 years of age suffering from acute malnutrition.
- Supported early identification, referral, and follow-up of children suffering from severe and moderate acute malnutrition in the community apparently at the reference area of target structures.

- Strengthened in the community belonging to the reference area of the target structures, the importance of the adoption of good hygienic-sanitary practices, of early child development, of an adequate and diversified diet, in particular for pregnant women and children, and the promotion of correct agricultural practices .

TARGET BENEFICIARIES

The target beneficiaries were Children under 5 years; Lactating mothers and pregnant women.

PROJECT APPROACH

An integrated approach was used in delivering nutrition services by combining different interventions at different levels such community, health facility and government system levels. This approach is important in sustaining the efforts for management of severe acute malnutrition.

PROJECT ACTIVITIES

Education on Early Child Development, Education on nutrition that combined five groups of foods, Demonstration on how to prepare food for children, Nutrition assessment for children under 5 years, training of community health workers, demonstration on suck garden, provision of seeds to households with children under 5 years, linkage and referral of children suffering from malnutrition
